SUMMARY

BIOGRAPHICAL

APPOINTMENTS and POSITIONS

HONORS and AWARDS

PUBLICATIONS

1. Peer-Reviewed Articles
2. Invited Reviews, Commentary, Chapters, Edited Volumes & Technical Reports
3. Books
4. Published Abstracts
5. Manuscripts Under Review / In Preparation

TEACHING

1. Courses
2. Tutorials and Workshops
3. Trainees

RESEARCH AND PROFESSIONAL ACTIVITIES

1. Grants
2. Invited Lectureships
3. Other research-related activities:
 - Patents and Licenses
 - Advisory Boards and Councils
 - Editorial Boards
 - Grant Review
 - Conference Organization
 - Membership in Professional Organizations
 - Software Development

SUMMARY

I am a cognitive neuroscientist, with over three decades of research experience in computational and mathematical modeling as well as empirical studies of human brain function and behavior, focusing on the neural mechanisms responsible for cognitive control and human intelligence, and how our growing understanding of these can be brought to bear in the design of computational architectures with more human-like cognitive capabilities. My work lies at the points of contact between neuroscience, psychology, computer science and mathematics, as well as behavioral economics and psychiatry, and involves collaborations with investigators in each of these fields. I also have considerable experience in the coordination and administration of scientific research, as one of the two founding Co-Directors of the Princeton Neuroscience Institute, leading multi-institutional projects (NIHM Conte Center; Templeton Center Grant; NSF Convergence Accelerator grant; PNI-Intel Labs collaboration), and a number of open source software development projects.

Theoretical contributions. Some of the contributions that have emerged from the theoretical work of my colleagues and I are: the first computationally-explicit models of how cognitive control may be implemented in the brain [5] and the role of prefrontal cortex in control [64]; the role of dopaminergic function in the gating and updating of information in prefrontal cortex [4][56], noradrenergic regulation of the explore/exploit tradeoff [47][115][129], and the interaction of these modulatory systems in adaptive regulation of exploration in reinforcement learning [108]; how these mechanisms may be disturbed in psychiatric disorders [9][49][109]; the role of anterior cingulate cortex in performance monitoring [68][84][180] and the optimal allocation of control [172][202]; mathematical analysis of optimal control of simple decision making processes [124][148]; normative approaches to understanding capacity constraints associated with working memory [61][133] and cognitive control [181][240][203]; and how the brain regulates the balance between flexible control-dependent and efficient automatic processing [215]. Increasingly, our work has come to focus on how these mechanisms contribute to higher cognitive functions and human intelligence, such as the control of memory, planning, and abstract reasoning [227][250][249][259], including ways in which the human brain achieves the flexibility of symbolic forms of computation [104][174][237][253] while preserving the efficiency of computation in neural networks, and how this can be used to inform research in machine learning and artificial intelligence [256][269][285].

Empirical and methodological contributions. The theoretical work summarized above has served as the foundation for a number of empirical and methodological contributions. Empirical contributions include: the first demonstrations in humans of sustained activity in PFC associated with working memory performance [17][31]; the distinction between the roles of dorsolateral PFC (in the regulatory functions of control) and anterior cingulate cortex (monitoring and evaluative functions of control [45][51][57][94]; and the role of the locus coeruleus / norepinephrine system in regulating the explore-exploit tradeoff [157][208]. We have also made influential contributions to advances in quantitative methods in cognitive neuroscience, including: the introduction of cluster size correction into the analysis of fMRI data [43]; the use of fMRI to directly study midbrain neuromodulatory nuclei [144]; the design of systems for realtime fMRI analysis [19][251] and closed-loop feedback designs [191][242]; and whole brain, full correlation analysis of fMRI data and its use in realtime analysis [184]. Finally, I have lead or co-lead several large software development projects, including: PsyScope [14], the first graphical environment for the design and execution of cognitive behavioral experiments; BrainIAK [245][251] (in collaboration with Intel Labs), an open-source, python-based toolbox for the implementation and optimization of advanced methods of brain image analysis; PsyNeuLink, an open-source, python-based environment for the design and exchange of computational models of brain and cognitive function; SweetPea [255], a framework for specifying empirical experimental designs and machine learning training environments using factorial structure, and generating maximally unbiased sampling of trials; and a model description format [269] for expressing models of brain and cognitive function as computational graphs in machine readable form for exchange across modeling environments.

BIOGRAPHICAL

Business Address:	Princeton Neuroscience Institute Princeton University Princeton, New Jersey 08544	Birth Date: 10/5/55 Birth Place: New York City Citizenship: U.S.A.
Business Phone:	(609) 258-2696 (voice)	
Email:	jdc@princeton.edu	
Home page:	https://jdc.princeton.edu	

EDUCATION and TRAINING

UNDERGRADUATE:

1973-77 Yale University	B.A., 1977 Biology and Philosophy
-------------------------	-----------------------------------

GRADUATE:

1979-83 University of Pennsylvania	M.D., 1983 Medicine
1987-90 Carnegie Mellon University	Ph.D., 1990 Cognitive Psychology

POST-GRADUATE:

1983-89 Internship in General Medicine, Neurology and Psychiatry Residency in Psychiatry Stanford University School of Medicine
1985-87 NIMH Research Training Fellowship Department of Psychiatry and Behavioral Sciences Stanford University School of Medicine

APPOINTMENTS and POSITIONS

ACADEMIC:

1989-	Assistant to Full Professor of Psychiatry
2005	Western Psychiatric Institute and Clinic
	University of Pittsburgh
1990-98	Assistant to Associate Professor of Psychology
	Carnegie Mellon University
1992-	Director, Clinical Cognitive Neuroscience Laboratory
present	University of Pittsburgh
1998-	Professor of Psychology, Princeton University
2005	
1999-	Founding Director, Center for the Study of Brain, Mind and Behavior
2007	Princeton University
2000-	Director, Program in Neuroscience
2008	Princeton University
2005-	Eugene Higgins Professor of Psychology, Princeton University
2012	
2005-	Founding Co-Director, Princeton Neuroscience Institute
2022	
2007-	Director, Scully Center for the Neuroscience of Mind and Behavior
present	
2012-	Robert Bendheim and Lynn Bendheim Thoman Professor in Neuroscience
present	Princeton University
2023-	Director, Graduate Certificate Program in Statistics and Machine Learning
present	Princeton University

HONORS and AWARDS

B.A. Cum Laude	1977
Distinction in the Biology Major	
Distinction in the Philosophy Major	
Yale University	
Miller Foundation Prize for Research in Psychiatry	1986
Department of Psychiatry and Behavioral Sciences	
Stanford University School of Medicine	
Annual Resident Research Award	1986
Northern California Psychiatric Society	
Joseph Zubin Memorial Fund Award for Research in Psychopathology	1993
Kempf Fund Award for Research Development in	2000
Psychobiological Psychiatry, American Psychiatric Association	
James McKeen Cattell Fund Sabbatical Fellowship Award	2003
Eugene Higgins Chaired Professorship, Princeton University	2005
Salmon Award Lecturer, New York Academy of Medicine	2006
Fellow, Association for Psychological Science	2007
Edward J. Sachar Award, Columbia University School of Medicine	2007
American Psychological Association Distinguished Scientific Contribution Award	2010
Fellow, American Association for the Advancement of Science	2012
William James Fellow Award, Association for Psychological Science	2018
Fellow, Cognitive Science Society	2019
Vannevar Bush Faculty Fellowship,	2021
Office of the Under Secretary of Defense for Research & Engineering	
Member, American Academy of the Arts & Sciences	2022
Lifetime Achievement Award, Society for Experimental and Cognitive Science,	2022
Division 3 of the American Psychological Association

PROFESSIONAL ACTIVITIES

TEACHING:

1. Courses

1989-96	Introduction to Cognitive Psychology (undergraduate survey course) Department of Psychology, Carnegie Mellon University
1989-96	Cognitive Neuroscience section of Cognitive Core (graduate survey course) Department of Psychology, Carnegie Mellon University
1990-93	Co-coordinator, Fellowship Training Program in Schizophrenia Research Western Psychiatric Institute and Clinic, University of Pittsburgh
1992-93	Research Methods in Cognitive Neuroscience (advanced undergraduate seminar) Department of Psychology, Carnegie Mellon University
1992-93	Functional Neural Circuits (graduate and advanced undergraduate seminar) Department of Psychology, Carnegie Mellon University
1994-95	Neural and Psychological Mechanisms of Working Memory (graduate and advanced undergraduate seminar) Department of Psychology, Carnegie Mellon University
1996-97	Advanced Topics in Cognitive Neuroscience (graduate and advanced undergraduate seminar) Department of Psychology, Carnegie Mellon University
1996-97	Biological and Psychological Mechanisms of Attention (graduate and advanced undergraduate seminar) Department of Psychology, Carnegie Mellon University; co- taught with Gary Aston-Jones.
1999-00	Neural Bases of Cognitive Control (undergraduate course) Department of Psychology, Princeton University
1999-01	Topics in Molecular and Cognitive Neuroscience (graduate seminar) Departments of Psychology and Molecular Biology, Princeton University
1999-01	Introduction to Neural Networks (undergraduate course) Department of Psychology, Princeton University
2001-02	Advanced Topics in Neural Network Models of Psychological Function (advanced undergraduate / graduate seminar) Department of Psychology, Princeton University
2002-03	Statistical Methods in Psychological Research (advanced undergraduate / graduate course) Department of Psychology, Princeton University
2004-07	Graduate Proseminar in Cognitive Psychology Department of Psychology, Princeton University

- 2009-16 Core Course for Ph.D. Program in Neuroscience
Princeton Neuroscience Institute, Princeton University
- 2017 Introduction to Cognitive Psychology (undergraduate survey course, with laboratory component)
Department of Psychology, Princeton University
- 2018-20 Computational Models of Psychological Function (undergraduate course, with laboratory component)
Princeton Neuroscience Institute and Department of Psychology, Princeton University
- 2022 The Computational Basis of Natural Intelligence in the Human Brain (undergraduate seminar)
Princeton Neuroscience Institute, Princeton University

2. Tutorials and Workshops

- May, 1990-93 Cohen JD, Servan-Schreiber D. Course co-directors, A primer on neural modeling in psychiatry. 144-7th Annual Meetings of the American Psychiatric Society, New York.
- July, 1991 Invited faculty member. James S. McDonnell Summer Institute in Cognitive Neuroscience, Dartmouth College, Hanover.
- October, 1993 Applications of Functional MRI to Studies of Human Memory. Invited tutorial, Memory Disorders Research Society, Boston.
- November, 1993 Functional neuroimaging. Invited tutorial, Neural Information Processing Society, Boulder.
- August, 1996 Neuroimaging and Behavior. Invited workshop, XXVI International Congress of Psychology, Montreal.
- January, 1997 The Role of Neuromodulation in Cognition: Physiological and Computational Approaches. Panel organizer, 30th Winter Conference on Brain Research, Breckenridge, Colorado.
- July, 1997 Invited faculty member. James S. McDonnell Summer Institute in Cognitive Neuroscience, Dartmouth College, Hanover.
- September, 2000 International Workshop on Neural Bases of Executive Functions and Performance Monitoring, Jena, Germany.
- July, 2001 Invited faculty member. James S. McDonnell Summer Institute in Cognitive Neuroscience, Dartmouth College, Hanover.

3. Trainees

Graduate advisees:

Therese Huston, Ph.D. (1990-1995)

CMU Department of Psychology

Behavioral and computational modeling studies of selective attention

Director, Center for Excellence in Teaching & Learning, University of Seattle

Todd Braver, Ph.D. (1992- 97)

CMU Department of Psychology

Computational and neuroimaging studies of prefrontal cortex and cognitive control

Professor of Psychology, Washington University, St. Louis

Matthew Botvinick, M.D., Ph.D. (1995-2001)

CMU Department of Psychology

Modeling and fMRI studies of the role of anterior cingulate cortex in conflict monitoring and control

Professor of Psychology and Neuroscience, Princeton University

Mark Gilzenrat, Ph.D. (1996-2006)

CMU Department of Psychology (1996-1998)

Princeton Department of Psychology (1998-2006)

Computational models and pupillometric studies of neuromodulatory influences on selective attention

Software architect, Navaraga Corporation

Raymond Cho, M.D. (1999-2003)

Department of Psychology, Princeton University

Assistant Professor of Psychiatry, University of Pittsburgh

Eric Shea-Brown, Ph.D. (1999-2004)

Program in Applied and Computational Mathematics, Princeton University

Co-advisor with Philip Holmes

Neural oscillators and integrators in the dynamics of decision tasks

Associate Professor of Applied Mathematics, University of Washington, Seattle

Sean Polyn (2000-2005)

Department of Psychology, Princeton University

Computational modeling of context updating, reinforcement learning and dopamine function

Associate Professor of Psychology and Psychiatry, Vanderbilt University

Aaron Schurger (2001-2008)

Department of Psychology, Princeton University

Electrophysiological and fMRI studies of perceptual awareness

Associate Professor, Inserm-CEA

Agatha Lenartowicz (2002-2008)

Department of Psychology, Princeton University

Behavioral, electrophysiological and fMRI studies of task switching

Postdoctoral Fellow, UCLA

Kimberly D'Ardenne McClure (2005-2008)

Department of Chemistry, Princeton University

fMRI studies of brainstem neuromodulatory nuclei

Postdoctoral Fellow, Montague Lab, Virginia Tech

Susan Robison (2005-2009; co-advised with Ken Norman)

Department of Chemistry, Princeton University

Behavioral and fMRI studies of cognitive control and episodic memory

Emily Chakwin (2006-2008)

Department of Psychology, Princeton University

Behavioral and fMRI studies of moral reasoning

Michael Todd (2006-2012)

Department of Psychology, Princeton University

Computational modeling studies of cognitive control

Data Scientist, Netflix

Adam Moore (2006-2011; co-advised with Andy Conway)

Department of Psychology, Princeton University

Behavioral and fMRI studies of moral reasoning

John White (2008-2013)

Department of Psychology, Princeton University

Behavioral and fMRI studies of economic decision making

Data Scientist, Netflix

Sarah Getz (2008-2013; co-advised with Andy Conway)

Department of Psychology, Princeton University

Behavioral and fMRI studies of economic decision making

Andra Geana (2010-2016)

Department of Psychology, Princeton University

Behavioral and fMRI studies of exploration and exploitation in decision making

Postdoctoral Fellow, Brown University

Jane Keung (2011-2016)

Princeton Neuroscience Institute, Princeton University

Behavioral and fMRI studies of prefrontal cortex and cognitive control

Postdoctoral Fellow, University of Arizona

Yida Wang (2011-2016)

Department of Computer Science, Princeton University

Co-advisor with Kai Li and Nick Turk-Browne

Full-correlation matrix analysis of fMRI data

Applied Scientist, Amazon

Olga Lositsky (2012-2017)

Princeton Neuroscience Institute, Princeton University
 Behavioral and fMRI studies of decision making
 Postdoctoral Fellow, Brown University

Gary Kane (2012-2018)
 Department of Psychology, Princeton University
 Behavioral and neurophysiological studies of foraging behavior and LC function in rodents
 Postdoctoral Fellow, Harvard University

Sachin Ravi (2014-2019)
 Department of Computer Science, Princeton University (Co-advisor with Kai Li)
 Meta-learning and controlled vs. automatic processing
 Machine Learning Research Engineer, Apple

Laura Bustamante (2014-2022)
 Princeton Neuroscience Institute, Princeton University
 Behavioral and fMRI studies of the cost of cognitive control
 Postdoctoral Fellow, Washington University

Sebastian Musslick (2014-2022)
 Princeton Neuroscience Institute, Princeton University
 Behavioral and fMRI studies of cognitive control
 Assistant Professor, Osnabrück University

Abigail Novick (2014-2022)
 Department of Psychology, Princeton University
 Behavioral and fMRI studies of representational sharing and multitasking

Lena Rosendahl (2016-2022)
 Department of Mechanical and Aerospace Engineering
 Co-advisor with Naomi Leonard
 Quantum probabilistic models of cognitive control
 Data Analyst, Mathematica

Mayank Agrawal (2017-2023)
 Department of Psychology, Princeton University
 Computational and Behavioral studies of learning and cognitive control

Zach Dulberg (2019-2025)
 Princeton Neuroscience Institute, Princeton University
 Learning mechanisms for acquiring representations that support generalization

Sreejan Kumar (2019-2025)
 Princeton Neuroscience Institute, Princeton University

Neural mechanisms underlying learning, representation and reasoning

Simon Segert (2019-2024)

Princeton Neuroscience Institute, Princeton University

Neurally-plausible mechanisms of relational reasoning

Tyler Giallanza (2020-2025)

Department of Psychology, Princeton University

Neural mechanisms underlying learning, representation and processing of semantics

Samyak Gupta (2020-present)

Department of Computer Science, Princeton University

Co-advisor with Kai Li

Compilation and efficient computational of heterogeneous cognitive models

Shanka Mondal (2020-present)

Electrical and Computer Engineering, Princeton University

Neural mechanisms underlying learning, representation and generalization

Declan Campbell (2022-present)

Princeton Neuroscience Institute, Princeton University

Computational models of human intelligence

Yukang Yang (2023-present)

Electrical and Computer Engineering, Princeton University

Computational models of human intelligence

Younes Strittmatter (2024-present)

Department of Psychology, Princeton University

Automated methods for scientific discovery

Udith Haputhanthrige (2024-present)

Electrical and Computer Engineering, Princeton University

Computational models of human visual processing

Younes Strittmatter (2024-present)

Department of Psychology, Princeton University

Automated methods for scientific discovery

Ph.D. Thesis Co-Advisor:

Cliona Golden (2004, Ingrid Daubechies), PACM, Princeton University

Adi Livnat (2005, Simon Levin), Ecology and Evolutionary Biology, Princeton University

Ilya Fischhoff (2006, Daniel Rubenstein), Ecology and Evolutionary Biology, Princeton University

Juan Gao (2007, Phil Holmes), Program in Applied and Computational Mathematics, Princeton University

Yuan (Sophie) Liu (2007, Phil Holmes), Physics, Princeton University

Caitlin Newberry (2007, Wolf Richter), Chemistry, Princeton University

Phil Eckoff (2008, Phil Holmes), Program in Applied and Computational Mathematics, Princeton University

Andrea Nedic (2011, Phil Holmes), Electrical Engineering, Princeton University

Samuel Feng (Phil Holmes), Program in Applied and Computational Mathematics, Princeton University

Stephanie Goldfarb (2013, Naomi Leonard), Program in Applied and Computational Mathematics, Princeton University

Eran Eldar (2014, Yale Niv), Princeton Neuroscience Institute, Princeton University

Paul Reverdy (2014, Naomi Leonard), Mechanical and Aerospace Engineering, Princeton University

Postdoctoral trainees:

Steve Forman, M.D., Ph.D. (1992-1994)

University of Pittsburgh Department of Psychiatry

fMRI studies of prefrontal function

Associate Professor of Psychiatry, University of Pittsburgh

Medical Director of the Center for Treatment of Addictive Disorders, Pittsburgh VA

Marius Usher, Ph.D. (1993-1995)

CMU Department of Psychology

Computational models of catecholaminergic neuromodulation and selective attention

Professor of Psychology and Neuroscience, Tel Aviv University

Deanna Barch, Ph.D. (1993-1995)

University of Pittsburgh Department of Psychiatry

Professor of Psychology and Radiology, Washington University, St. Louis

William Perlstein, Ph.D. (1993-1996)

University of Pittsburgh Department of Psychiatry

Electrophysiological and fMRI studies of working memory in schizophrenia

Associate Professor of Clinical and Health Psychology and Psychiatry, University of Florida, Gainesville

Gregory Berns, M.D., Ph.D. (1995-1998)

University of Pittsburgh Department of Psychiatry

Functional neuroimaging studies of novelty detection

Professor of Economics, Emory University

Randy Gobbel, Ph.D. (1997-1998)

Carnegie Mellon University Department of Psychology

Computational modeling studies of basal ganglia function in control of sequential action

Computer Scientist, Artificial Intelligence Center, SRI International

James Kroger (1998-2001)

Princeton University Department of Psychology
 fMRI studies of prefrontal cortex organization
 Professor of Psychology, New Mexico State University

Nicholas Yeung, Ph.D. (1999-2004)
 Princeton University Department of Psychology
 Modeling, ERP and fMRI studies of conflict monitoring and cognitive control
 University Lecturer in Experimental Psychology, University of Oxford

Gesine Dreisbach, Ph.D. (2000-2001)
 Princeton University Department of Psychology
 fMRI studies of task switching
 Professor of Psychology, University of Regensburg

Clay Holroyd, Ph.D. (2001-2004)
 Princeton University Department of Psychology
 Neural network modeling, ERP, and fMRI studies of performance monitoring and reinforcement learning
 Professor of Psychology, University of Victoria

James Rilling, Ph.D. (2001-2003)
 Center for the Study of Brain, Mind & Behavior, Princeton University
 Neural mechanisms of economic decision making; neural mechanisms in placebo responding
 Associate Professor of Anthropology and Psychiatry and Behavioral Sciences, Emory University

Alan Sanfey, Ph.D. (2001-2003)
 Center for the Study of Brain, Mind & Behavior, Princeton University
 Neural mechanisms of economic decision making; neural mechanisms in placebo responding
 Associate Professor of Psychology, University of Arizona
 Principal Investigator, Donders Institute for Brain, Cognition and Behavior, Radboud University

Rafal Bogacz, Ph.D. (2002-2004)
 Princeton University Department of Psychology
 Neural network modeling and ERP studies of task switching and performance monitoring
 Associate Professor of Clinical Neuroscience, University of Oxford

Sander Nieuwenhuis, Ph.D. (2002-2003)
 Princeton University Department of Psychology
 ERP studies and neural network modeling of performance monitoring, task switching and the attentional blink
 Assistant Professor, Cognitive Psychology Unit, Leiden University

Joshua Greene, Ph.D. (2001-2006)
 Princeton University Department of Psychology
 Neural bases of moral reasoning

Professor of Psychology, Harvard University

Samuel McClure, Ph.D. (2003-2007)

Princeton University Department of Psychology

Neural network modeling and neuroimaging studies of reinforcement learning and decision making

Assistant Professor of Psychology, Stanford University

Jean-Baptiste Pochon, Ph.D. (2003-2005)

Princeton University Department of Psychology

Neuroimaging studies of decision making, conflict monitoring and cognitive control

Postdoctoral Fellow, L'Hôpital de la Salpêtrière in Paris

Patrick Simen, Ph.D. (2003-2007)

Princeton University Program in Applied & Computational Mathematics

Computational modeling, mathematical analysis, behavioral and neuroimaging studies of decision making and cognitive control

Assistant Professor, Oberlin College

Jason Chein, Ph.D. (2004-2005)

Princeton University Department of Psychology

Neuroimaging studies of prefrontal cortex organization and function

Assistant Professor of Psychology, Temple University

Brent Field, Ph.D. (2004-2015)

Center for Study of Brain, Mind and Behavior

Center for Health and Well-Being, Woodrow Wilson School of Public Policy

Behavioral and neuroimaging studies of attention and emotional regulation among meditation practitioners

Angela Yu, Ph.D. (2004-2008)

Princeton University Department of Psychology

Computational modeling and mathematical analysis studies of decision making and cognitive control

Associate Professor of Cognitive Science, University of California, San Diego

Damon Tomlin, Ph.D. (2006-2013)

Princeton University Department of Psychology and Princeton Neuroscience Institute

Neuroimaging studies of economic and social decision making and cognitive control

KongFatt Wong-Lin, Ph.D. (2006-2009)

Princeton University Department of Mechanical and Aerospace Engineering

Computational modeling and mathematical analysis studies of decision making and cognitive control

Lecturer, Ulster University

Yael Niv, Ph.D. (2007-2008)

Princeton University Department of Psychology

Neuroimaging and computational modeling studies of decision making and cognitive control

Associate Professor of Psychology and Neuroscience, Princeton University

Benjamin Eppinger, Ph.D. (2007-2010)

Princeton University Department of Psychology Center for Health and Well-Being, Woodrow Wilson School of Public Policy

Neuroimaging studies of age-related differences in economic decision making and cognitive control

Researcher, MPI for Human Development, Berlin

Marieke van Vugt, Ph.D. (2008-2010)

Princeton University Department of Psychology

Neuroimaging and computational modeling studies of decision making and cognitive control

Assistant Professor, University of Groningen

Fuat Balci, Ph.D. (2008-2010)

Princeton University Department of Psychology

Theoretical and behavioral studies of interval timing and decision making

Assistant Professor, Department of Psychology, Koc University, Istanbul

Robert Wilson, Ph.D. (2009-2014)

Princeton University Department of Psychology and Princeton Neuroscience Institute

Theoretical, behavioral and neuroimaging studies of cognitive control & locus coeruleus function

Assistant Professor, University of Arizona

Michael Schwemmer, Ph.D. (2010-2012)

Princeton Neuroscience Institute

Theoretical analyses of capacity constraints on cognitive control

Postdoctoral Fellow, Mathematical Biosciences Institute, Ohio State University

Jarrold Lewis-Peacock, Ph.D. in Psychology, University of Wisconsin-Madison

Princeton Neuroscience Institute (2011-2013; co-advised with Ken Norman)

Neuroimaging studies of cognitive control and prospective memory

Assistant Professor, University of Texas, Austin

Elliot Ludvig, Ph.D., Psychological and Brain Sciences, Duke University

Princeton Neuroscience Institute (2011-2013)

Theoretical model and behavioral studies of learning, memory and cognitive control

Professor, University of Warwick

Amitai Shenhav, Ph.D. in Psychology, Harvard University

CV Starr Fellow, PNI (2012-2016; co-advised with Matthew Botvinick)

Theoretical and neuroimaging studies of the costs of cognitive control

Associate Professor, Brown University

Aaron Bornstein, Ph.D. in Neuroscience, NYU

Princeton Neuroscience Institute (2013-2019; co-advised with Ken Norman)

Neuroimaging studies of episodic memory and decision making

Assistant Professor, University of California, Irvine

Ida Momennajad, Ph.D.

Princeton Neuroscience Institute (2013-2018; co-advised with Ken Norman & Nathaniel Daw)

Neuroimaging and theoretical modeling studies of prospective memory

Michael Shvartsman, Ph.D. in Cognitive Science, University of Michigan

Princeton Neuroscience Institute (2014-2018)

Theoretical analysis of decision making; Bayesian hierarchical analysis of neuroimaging data

Occulus Research

Hasan Kayhan Ozcimder, Ph.D. in Mechanical Engineering, Boston University

Princeton Neuroscience Institute (2015-2017; co-advised with Naomi Leonard)

Mathematical modeling of capacity constraints in controlled (interactive parallel) processing

Mathworks

Michael Lesnick, Ph.D in Applied Mathematics, Stanford University

Princeton Neuroscience Institute (2016-2018)

Tools for topological data analysis (TDA) and their application to neuroscientific data analysis

Department of Mathematics, SUNY Albany

Biswadip Dey, Ph.D. in Mechanical Engineering, University of Maryland, College Park

Princeton Neuroscience Institute (2015-present; co-advised with Naomi Leonard)

Mathematical modeling of capacity constraints in controlled (interactive parallel) processing

Marius Cătălin Iordan, Ph.D. in Computer Science, Stanford University

Princeton Neuroscience Institute (2016-present; co-advised with Daniel Osherson)

Theoretical and neuroimaging studies of semantic representations and cognitive control

Simon Cullen, PhD. in Philosophy, Princeton University

Princeton Neuroscience Institute (2017-2018)

Theoretical and experimental studies of moral reasoning

Assistant Professor, Carnegie Mellon University

Greg Henselman, Ph.D. in Applied Mathematics, University of Pennsylvania

Princeton Neuroscience Institute (2017-present)

Tools for topological data analysis (TDA) and their application to neuroscientific data analysis

Steven Frankland, Ph.D. in Psychology, Harvard University

Princeton Neuroscience Institute (2017-2023)

Neural network modeling of abstract reasoning

Assistant Professor, Dartmouth University

Taylor Webb, Ph.D. in Psychology, Princeton University

Princeton Neuroscience Institute (2018-2019)

Neural network modeling of analogical reasoning

Bryant Jonkes. Ph.D. in Cognitive Psychology, Leiden University, the Netherlands

Princeton Neuroscience Institute (2019-2020)

Theoretical modeling and behavioral studies of the dynamics of cognitive control

Assistant Professor in Cognitive Psychology Unit, Leiden University, the Netherlands

Javier Masis, Ph.D. in Psychology, Harvard University

Princeton Neuroscience Institute (2020-present)

Neural network modeling of learning and control

Kamesh Krishnamurthy, Ph.D. in Computational Neuroscience, University of Pennsylvania

CV Starr Fellow, PNI and Center for the Physics of Biological Function Fellow (2018-present)

Neural network models of symmetry discovery

Harrison Ritz, Ph.D. in Psychology, Brown University

CV Starr Fellow, PNI (2022-present)

Theoretical and neuroimaging studies of the dynamics of cognitive control

Andrew Nam, Ph.D. in Psychology, Stanford University

Fellow in Natural and Artificial Minds, (2024-present)

Computational models of human intelligence

Software Development

PsyScope [14]: Designer and Co-Producer with Brian MacWhinney, Psychology, Carnegie Mellon University — this is a graphical, interactive program for the design and implementation of cognitive experimental tasks on Macintosh computers. It provides the ability to present stimuli in text, graphic, and acoustic form, and can be used to record manual or voice responses with millisecond accuracy. It incorporates a fully general scripting language, as well as a graphic interface, and is extensible through the use of plug-and-play add-on modules. PsyScope was originally designed for Mac OS prior to and through System 9. It was independently ported to MacOS X, and continues to be supported by the community, freely available, and widely used (with over 3,000 downloads) for experimental research and as a teaching instrument in research centers throughout the world. The design of PsyScope also provided one of the foundations for E-Prime, a PC/Windows-based commercially supported package that was developed in collaboration with Psychology Software Tools (PST) Inc. and is also in widespread use.

Brain Image Analysis Kit [245]: Project Co-Director, with Ted Willke, Brain Inspired Computing Lab, Intel Labs; Ken Norman, Neuroscience and Psychology, Princeton; and Nicholas Turk-Browne, Psychology, Yale University — this is a Python-based, open source software package, developed in collaboration with Intel Labs, that supports the application of advanced methods from machine learning and multivariate statistics to the analysis of neuroimaging data. It is tightly integrated with *SciKit-Learn*, and includes modules for Full Correlation Matrix Analysis (FCMA; Wang et al. 2015), Multi-voxel Pattern Analysis (MVPA), a suite of methods for Shared Response Modeling (SRM) (including hyper alignment and Inter-Subject Functional Correlation [IFSC]), Topographic Factor Analysis (TFA), and Bayesian-derived methods for Representational Similarity Analysis (RSA). Within the first year and a half of its development it has attracted over 9,000 downloads.

RT-Cloud [251]: Project Co-Director, with Ken Norman, Princeton Neuroscience Institute. This is an open-source software package, integrated into the BrainIAK environment, that makes it easier to build and deploy real-time fMRI experiments. The framework provides a coordination hub between the experimenter's script, a subject feedback script, the scanner data, and experiment control. It streams scanner data (in real-time) to an experimenter's script and forwards the results for use in subject feedback (optionally using tools like PsychoPy, jsPsych, or PsychToolbox). It provides a web-based user interface that allows for starting and stopping runs, changing settings, and viewing output. It can be configured to run in the cloud, on a cluster, or in the control room. This framework is under active development with funding from NIMH to further extend its capabilities, including support for standards such as BIDS and OpenNeuro.

PsyNeuLink: Designer and Lead Developer, with Abhishek Bhattacharjee, Computer Science, Yale University and Amitai Shenhav, Brain and Cognitive Sciences, Brown University; and support from Templeton World Charitable Foundation and NIMH — this is a "block modeling environment" designed for use by neuroscientists, psychologists, computational psychiatrists and others interested in building system-level models of the computational mechanisms underlying brain function and its expression in psychological processes and behavior, and in exploring their relationship to developments in research on machine learning and artificial intelligence. It allows components to be constructed that implement various, possibly disparate functions, at potentially different levels of analysis and/or timescale of operation, and integrate these into a coherent modeling environment that can be used to simulate and study their interaction. PsyNeuLink is written in Python, is open source, and meant to be extended. Its goal is to provide an environment for implementing models that are expressed in a concise and easy to read form, and that can be executed, shared, compared, and integrated with one another. PsyNeuLink maintains a publicly accessible library of its components and models, to which users can contribute, providing a common repository for model-sharing in a manner paralleling data-sharing efforts in empirical research.

SweetPea [255]: Co-Designer, with Matthew Flatt and Vivek Srikumar, Computer Science, University of Utah — this is an experimental design environment that simplifies and standardizes the format in which experimental factors are expressed and combined, and used to generate balanced samples of valid trial sequences. As experimental designs in psychology and neuroscience — as well as the theories they are designed to test — become more complex, the ability to insure appropriately balanced sampling of relevant experimental and control conditions becomes increasingly difficult, and designs that do so increasingly difficult to express and/or interpret, which poses challenges to reliability and/or reproducibility of results. Similar problems arise in computational modeling, where uncontrolled or poorly understood differences in the inputs to

a simulation can confound interpretations of its behavior, just as it does empirical data. SweetPea addresses this problem by providing a declarative language for expressing a design— in terms of factors (experimental variables), levels (values for those variable to be sampled), crossings among factors, and constraints on trial sequences (e.g., number or types of repeats). The design is then translated into a form (currently, conjunctive normal form) that can be sampled using a SAT solver, to insure that valid trial sequences are sampled in a balanced fashion.

ModECI (Model Exchange and Convergence Initiative) [269]: Lead Developer with Padraig Gleason, Neuroscience, Physiology and Pharmacology, University of College London and NeuroML; in collaboration with Abhishek Bhattacharjee, Computer Science, Yale University; Sharon Crook, Arizona State University and NeuroML, Ted Willke, Brain Inspired Computing Lab, Intel Labs; and support from the NSF *Convergence Accelerator Program* — this project seeks to accelerate the convergence of progress in the brain, cognitive and computer sciences by facilitating the exchange of computational models through the development of a standardized model description format that expresses models in the form of a computational graph in which each node is a computational component and edges specify connections between them that determine the flow of computation. The format is implemented in serialized forms (e.g., JSON, YAML) that allows the exchange of models in machine-readable form among a broad range of existing environments — from biologically detailed ones (e.g., NeuroML, Emergent, and Nengo) and system-level level packages (such as PsyNeuLink) to abstract symbol processing environments used in cognitive science (such as ACT-R) and neural network modeling ones served by the ONNX standard used in the machine learning community (e.g., PyTorch and TensorFlow).
